

First Annual Cornell Cancer Research Symposium

SAVE THE DATE - April 5-6, 2018

Interdisciplinary, translational cancer research in Ithaca benefits from integrating researchers from different departments and colleges. The first Annual Cancer Symposium will be held with the following goals:

- To educate each other about the different areas of cancer research that are being pursued on the Ithaca campus with a focus on integrating outstanding strengths from the life and physical sciences.
- To identify synergies among specific Ithaca-based groups through round-table discussions that could seed new collaborations and catalyze the development of multi-investigator research grants as well as training grants.
- To interact with leaders of cancer research at Weill Cornell Medicine to define Ithaca-based strengths that can both complement and fortify translational cancer research on the NYC campus.

Invited speakers will include:

Low Cantley, Director of the Sandra and Edward Meyer Cancer Center at Weill Cornell Medicine.

Harold Varmus, Lewis Thomas University Professor of Medicine at Weill Cornell Medicine.
